-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on August 11, 2004 has been entered.

Claims 45-64 are allowed.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 65 and 66 are rejected under 35 U.S.C. 103(a) as being unpatentable over Lee et al (US Patent No. 4,840,808).

Lee et al disclose a preservative composition comprising magnesium, zinc, copper, and calcium for use in the production of pasta (see entire patent, especially the Examples).

The claims differ as to the specific amounts claimed.

In the absence of a showing to the contrary, the amounts claimed are merely seen to be a matter of choice and well-within the skill of the art, where too much or too

Art Unit: 1761

little would not have the desired known effect. At most the amounts are seen to be no more than optimization, see *In re Boesch* 205 USPQ 215.

It would have been obvious to a person of ordinary skill in the art, at the time the invention was made, to use the claimed amounts in that of Lee et al because the amounts chosen are no more than within the skill of the art.

Lee et al teaches the use of the claimed composition in the preparation of pasta where it is not seen how this differs from that of the claimed invention. The selection of the time of addition is merely a matter of choice and well-within the skill of the art. Applicant claims a composition. It is noted that the recitation that the product is made by a new process, if the process were indeed new and patentable, does not render an otherwise unpatentable product new and patentable. The product must stand on its own invention, independently of the process of producing same. See *In re Marosi*, 218 USPQ 195; *In re Thorpe*, 227 USPQ 964; *Ex parte Jungfer*, 18 USPQ 2nd 1976.
